DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

2. Claims 1-27 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach a reading circuit for reading data from one memory cell of a plurality of memory cells. The reading circuit comprises: division sensing circuits and a current-voltage conversion circuit. Each of the division sensing circuits includes a current load circuit for supplying a current to a selected memory cell via a corresponding sensing line, and a sense amplifier for sensing a potential difference between the potential of the corresponding sensing line and a potential of a corresponding reference line. And the current load circuit has a current supply capability which is different from the current supply capability of the current load circuit included in another division sensing circuits.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Uekubo; Masaki (U.S. Patent 6118701), Tanzawa; Toru et al. (U.S. Patent 6233189), Micheloni; Rino et al. (U.S. Patent 6301149), and Kim; Dae-Han (U.S. Patent 6445616) teach parallel sensing systems in semiconductor memory devices.
